This RFC reports on the status of most Network Hosts from October 12 to October 22. (Monday, October 11 was Columbus Day.) During these two weeks, the general status of these Hosts remained as it had been previously.

The table on the following page summarizes the daily information on Host status for this period.

TWORK DRESS	SITE	COMPUTER	DAY, DATE and TIME (Eastern)								
			T 10/12 1530	W 10/13 1600	Th 10/14 1600	F 10/15 1700	M 10/18 1730	T 10/19 1630	W 10/20 1230	Th 10/21 1330	F 10/22 1430

where

D = Dead (Destination Host either dead or inaccessible [due to network partitioning or local IMP failure] from the BBN Terminal IMP.)

R = Refused (Destination Host returned a CLS to the initial RFC.)

T = Timed out (Destination Host did not respond in any way to the initial RFC, although not dead.)

H = 1/2 Open (Destination Host opened a connection but then either immediately closed it, or did not respond any further.)

O = Open (Destination Host opened a connection and was accessible to users.)

* The UCLA IBM-360/91 currently has Remote Job Service (NETRJS), but has not implemented a full server Telnet System. The BBN Terminal IMP is not equipped to test NETRJS; however, we are assuming that recept of the UCLA explanatory message indicates that NETRJS is also functioning.

These sites advertise that they may not have their system available at these times.
